Research Profile

My research centers on **LLM reasoning and AI agents**, with a focus on context-aware reasoning, autonomous interactive learning, continual adaptation, and agent evolution. Complex tasks in time-series intelligence and scientific intelligence provide the application settings for this research.

Core question: How can agents reliably solve problems through reasoning and interaction when information is incomplete, environments change, and feedback is costly?

- **Time-series intelligence — modeling the dynamic world.** Context awareness, heterogeneous time-series modeling, slow-thinking cognitive reasoning, and autonomous agent interaction for understanding complex dynamic systems.
- **Scientific intelligence — understanding the scientific world.** Scientific data, tools, literature and knowledge; tool-augmented scientific reasoning; and capability enhancement of scientific foundation models.
- **Autonomous learning and evolving agents.** Capability enhancement, agentic reinforcement learning, continual learning, memory, and the evolution of both models and agents through interaction.

Academic Appointments & Research Experience

Associate Researcher Jun. 2023 – present

School of Computer Science and Technology, USTC, Hefei, China.

Affiliated with the State Key Laboratory of Cognitive Intelligence.

Research Intern Jun. 2019 – Oct. 2019

Data Service Center, Platform and Content Group, Tencent, Shenzhen, China.

Engineering Intern Jul. 2018 – Sep. 2018

Lab of Big Data, Core Technology R&D Platform, iFLYTEK, Hefei, China.

Education

Ph.D. in Computer Science and Technology Sep. 2017 – Jun. 2023

University of Science and Technology of China, Hefei, China.

Supervisor: Prof. Qi Liu.

Bachelor of Management Sep. 2013 – Jul. 2017

Hefei University of Technology, Hefei, China.

Major: Marketing Management.
